

Exodus

Wireless Leiden Volunteers gathering

Rick van der Zwet <rick@wirelessleiden.nl>
November 5th 2008

<http://www.wirelessleiden.nl/projects/exodus>

The current...

The blob is going to get you...

GENESIS

The current...

4 Perl scripts roughly 800 lines

Configuration based on pure perl code

No input validation done

Text based 'database'

...coming for a rescue

Rick van der Zwet - Exodus

Django

“Django is a high-level Python Web framework that encourages rapid development and clean, pragmatic design.”

Dont Repeat Yourself principle

Focused towards the user

Exodus

Configuration via web-interface

User-friendly, e.g. checking implicit 'rules'

Flexible output generation, using templates

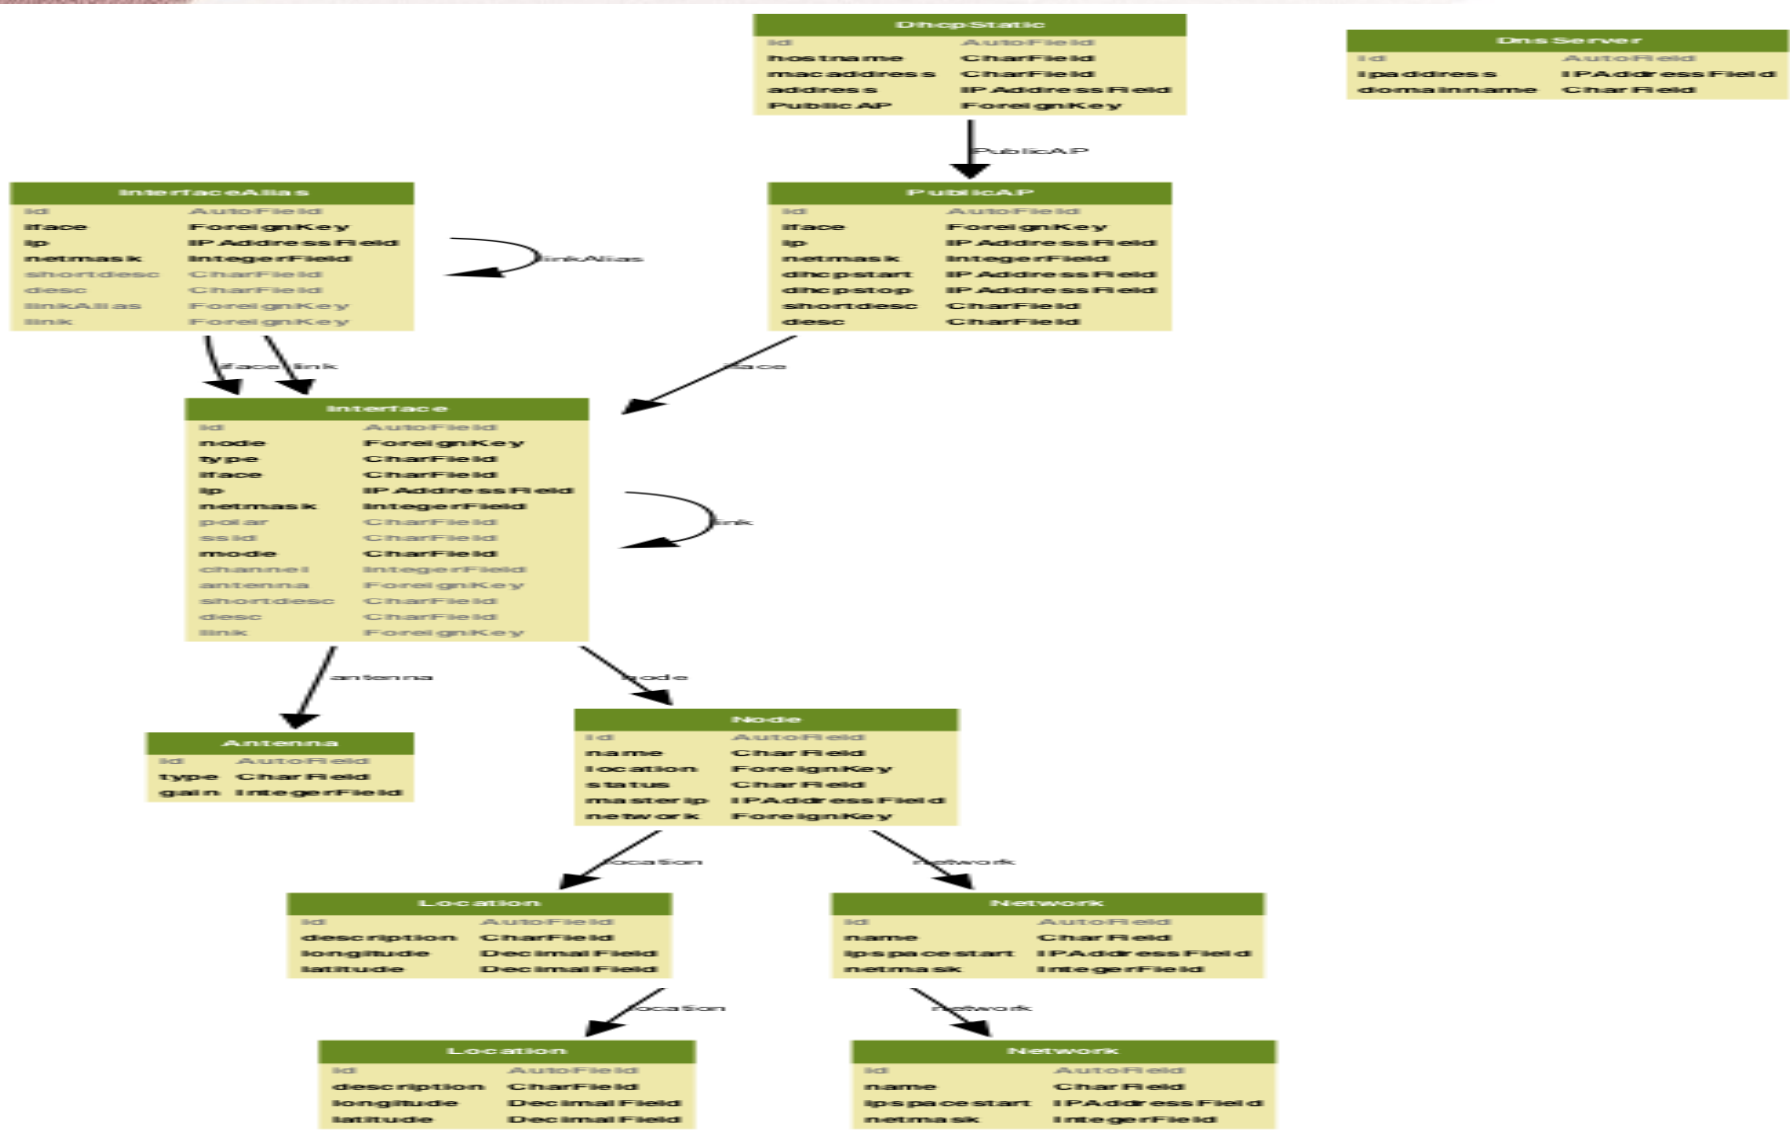

Easily extendable

Maintainable

Database details

rick@JOOST-0296:~/svn/wleiden/code/exodus/trunk 521\$./bin/django graph_models exodus | dot -Tpdf -o exodus-database.pdf

Demo Time!

Live demo: <http://rick.wleiden.net/exodus/>

DIY demo (requires inet connection):

```
$ svn co http://svn.wirelessleiden.nl/svn/projects/exodus/trunk exodus-latest  
$ cd exodus-latest  
$ make debug  
# Once done and server is running goto http://localhost:8000 to access your  
# instance
```

Help needed!

Fixing bugs and implementing features
a.k.a. actual coding

Testing

Graphical design
